## EDUCATION

University of Alberta  
Bachelor of Science in Computing Science (Specialization)  
GPA: 3.54 / 4.0

Edmonton, AB  
Expected Dec 2026

**Relevant Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Software Engineering, Database Systems, Programming in C

## TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript (ES6+), TypeScript, C, SQL

**Frameworks & APIs:** Node.js, Express, FastAPI, REST APIs, JWT, React, OpenAI API

**Databases & DevOps:** PostgreSQL, Git, Docker, GitHub Actions (CI/CD), Azure

**Testing:** Unit Testing, JUnit, Postman

## EXPERIENCE

Software Developer (Full Stack)  
Next Up Hoops ([Live Site](#)) | [GitHub](#) | [Demo \(Loom\)](#)

Edmonton, AB  
Nov 2024 – Present

- Sole developer of a **full-stack platform** for a **120+ athlete** youth basketball organization, deploying frontend to **Vercel** and backend services to **Render**.
- Developed backend using **Node.js**, **Express**, **PostgreSQL**, implementing **JWT-based authentication** to support **role-based access** for admins and players.
- Implemented registration, payment, and account-management workflows, reducing administrative processing time by over **80%**.
- Integrated **Stripe Checkout**, automated email flows, and password recovery; wrote **Postman API tests** to validate authentication, registration, and payment flows.

## PROJECTS

Custom Memory Allocator | [GitHub](#)

- Implemented a custom **malloc/free allocator** in **C**, supporting heap expansion, block splitting, and coalescing.
- Designed **dual linked-list structures** (heap list and free list) to optimize memory reuse and allocation efficiency.
- Built randomized **stress tests** to validate correctness under memory fragmentation.

Resume Skill Gap Analyzer | *FastAPI, Sentence-BERT, OpenAI API, Docker, Azure* | [GitHub](#)

- Built a resume-job matching system using **Sentence-BERT embeddings** and the **OpenAI API** to identify skill gaps and suggest relevant learning resources.
- Designed and deployed containerized **FastAPI services** to **Azure** with automated **CI/CD** via GitHub Actions.
- Implemented REST APIs for embedding comparison and feedback generation.

Event Lottery App | *Android (Java), Firebase* | [GitHub](#)

- Collaborated in a **6-person Agile/Scrum team** to develop an **Android app in Java**, using **GitHub issues**, **sprint planning**, and **code reviews**.
- **Owned the complete admin system for the application**, implementing role-based logic and administrative event management workflows using **Firebase**.
